

# Masters of Petroleum Engineering

The greater-Houston area is the undisputed global center of the oil and gas industry. Within its boundaries exist the most advanced technologies used in the petroleum sector. This is also where many of the best minds in the industry use their knowledge to find and extract petroleum from reservoirs around the world. The Petroleum Engineering Program at the University of Houston Cullen College of Engineering takes advantage of the facilities and expertise located in the area to provide its students with a Petroleum Engineering education that cannot be duplicated anywhere else.

Whether your bachelor's degree is in Petroleum, Chemical, Mechanical or any other engineering discipline, you can pursue a Master of Petroleum Engineering degree at the University of Houston. You can even work full time in the oil and gas industry, or in any other sector, while you attend classes. And when you graduate, this advanced degree, combined with the severe shortage of manpower in the petroleum industry, will give you the competitive edge while seeking a well-paying technical job in the best and most robust industry in the world.

## **The features of the UH Petroleum Engineering Program include:**

- » Well-known industry experts teaching the latest technology and industry practices.
- » Night classes (usually 5:30 – 8:30 p.m.) that make it easy for professionals to attend classes while holding a full-time job.
- » Access and visits to some of the best research labs in the industry.
- » Access to UH research and teaching facilities, libraries, and other educational benefits.

**For more information about the program, or to apply for admission, please visit our website, [www.ch ee.uh.edu/petroleum/](http://www.ch ee.uh.edu/petroleum/), or call Ms. Yolanda Thomas at 713-743-4311.**
