The University of Houston Cullen College of Engineering offers graduate-level certificate programs geared towards working engineers who are looking to specialize in a specific area or field. Some courses are offered online, while others are face-to-face on evenings and weekends. Taught by award-winning professors and world-renowned experts, UH Engineering’s graduate courses are among the most rigorous and well-respected in the world. Learn how to get all the credentials to make things happen below!

**Chemical and Biomolecular Engineering**
- Process Engineering and Modeling

**Civil and Environmental Engineering**
- Global Climate, Energy and Environment

**Electrical and Computer Engineering**
- Power Systems and Smart Grid
- Power Electronics and Renewable Energy

**Mechanical Engineering**
- Subsea Engineering
- Advanced Subsea Engineering
- High-Performance Computing
- Data Analytics and Condition and Performance Monitoring of Engineered Systems

**Petroleum Engineering**
- Unconventional Energy Resources
